

# React Course in Jaipur

## Kiyan Training Institute

---

### Course Overview

The React Course in Jaipur at Kiyan Training Institute is designed to help students learn modern front-end web development using React.js and JavaScript. The course focuses on building fast, dynamic, and scalable user interfaces for web applications through practical training and live projects.

Students will learn React fundamentals, components, hooks, routing, API integration, state management, and deployment techniques. This training program is ideal for beginners, students, job seekers, and developers who want to build professional front-end applications and become React Developers or Frontend Developers. ### Course Details Table

Course Information	Details
Course Name	React Course in Jaipur
Course Technology	React.js
Course Level	Beginner to Advanced

Training Type	Practical & Project-Based
Mode of Training	Online & Offline
Course Duration	3 Months / 6 Months
Eligibility	Students, Freshers, Developers
Live Projects	Included
Internship Support	Available
Certification	Industry-Recognized Certificate
Placement Assistance	100% Job Assistance
Trainers	Industry Experts
Batch Type	Small Batches
Tools Covered	React.js, JSX, APIs, Redux, Git
Career Support	Resume & Interview Preparation

Course Fee

₹29,999

---

## Course Highlights

- Learn React.js from Basic to Advanced Level
  - Hands-on Practical Development Sessions
  - Live Project-Based Learning
  - Industry-Oriented Curriculum
  - API Integration Training
  - State Management Concepts
  - Expert Trainers with Real-world Experience
  - Career Guidance & Placement Assistance
  - Interview Preparation Sessions
  - Industry-Recognized Certification
- 

## What You Will Learn

- Front-end Development Fundamentals
  - React Component-Based Architecture
  - JSX Syntax & React Concepts
  - State & Props Management
  - React Hooks
  - Routing in React Applications
  - API Integration
  - CRUD Application Development
  - Performance Optimization
  - Deployment & Hosting
- 

## Course Modules

### 1. Front-End & React Introduction

- Modern Front-End Development
  - Why React.js
  - Features & Advantages of React
  - React vs Other Frameworks
  - Development Environment Setup
  - Introduction to Node.js & npm
- 

## 2. JavaScript for React (ES6+)

- let & const
  - Arrow Functions
  - Template Literals
  - Destructuring
  - Spread & Rest Operators
  - Array Methods
  - Async JavaScript Basics
- 

## 3. React Basics

- Creating First React App
  - JSX Syntax
  - Components & Component Types
  - Functional Components
  - Folder Structure
- 

## 4. Props & State

- Passing Data with Props
  - State Management
  - useState Hook
  - Event Handling
  - Conditional Rendering
-

## 5. React Hooks

- Introduction to Hooks
  - useState
  - useEffect
  - useRef
  - Custom Hooks Basics
- 

## 6. Component Lifecycle & Rendering

- Lifecycle Concepts
  - Rendering Process
  - Re-rendering
  - Performance Optimization Basics
- 

## 7. Forms & Event Handling

- Controlled Components
  - Form Validation
  - Handling Inputs & Checkboxes
  - Form Submission
- 

## 8. Routing in React

- React Router Setup
  - Route & Navigation
  - Dynamic Routing
  - Protected Routes
- 

## 9. Working with APIs

- Fetch API
  - Axios
  - Async Data Handling
  - CRUD Operations
  - Loading & Error Handling
- 

## 10. State Management

- Lifting State Up
  - Context API
  - Redux Basics
  - Global State Management
- 

## 11. Styling in React

- CSS in React
  - SCSS Basics
  - CSS Modules
  - Inline Styling
  - Styled Components Overview
- 

## 12. React Performance & Best Practices

- Code Splitting
  - Lazy Loading
  - Reusable Components
  - Folder Structure Best Practices
- 

## 13. Project Development

Students will build:

- Single Page Applications
  - Dashboard Interfaces
  - CRUD Applications
  - API-Based Projects
  - Responsive Web Applications
- 

## 14. Deployment & Career Preparation

- Build Process
  - Hosting on Netlify & Vercel
  - Git & GitHub Basics
  - Resume Building
  - Interview Preparation
- 

## Live Projects Included

- React Dashboard
  - Todo Application
  - Weather Application
  - API-Based CRUD Project
  - Responsive Front-End Website
- 

## Tools & Technologies Covered

- React.js
- JavaScript (ES6+)
- JSX
- React Router
- Axios
- Redux
- Context API
- Git & GitHub
- Netlify
- Vercel

---

## Career Opportunities

After completing the React course, students can apply for:

- React Developer
- Front-End Developer
- UI Developer
- JavaScript Developer
- Web Application Developer
- Full Stack Developer

---

## Certification

Students receive an industry-recognized React Course Certificate after:

- Completing training sessions
- Finishing assignments
- Completing live projects
- Final project approval by trainers ([Kiyon Training Institute](#))

---

## Placement Assistance

- Resume Building
- Mock Interviews
- Career Guidance
- Internship Opportunities
- Job Assistance Support

---

## Why Choose Kiyon Training Institute

- Practical Learning Approach

- Industry-Oriented Curriculum
  - Live Project Training
  - Experienced Trainers
  - Affordable Course Fees
  - Personalized Attention
  - Career-Focused Training
- 

## Student Learning Benefits

Students gain:

- Real-world Front-End Development Skills
  - Hands-on React.js Experience
  - Industry-Level Project Development Knowledge
  - API Integration Experience
  - Modern UI Development Skills
  - Deployment & Hosting Knowledge
-
